

ELECTRICAL INSULATION TAPE

IMPROVE BATTERY EFFECTIVENESS

Electrical Insulation
outside of the cell

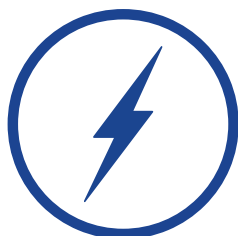

Fixation and
protection inside
of the cell

TO PROTECT

Use of Nitto electrical tape will protect your battery systems against short circuit to ensure passenger safety: High bond performance answers to the next challenge of cell to car design, high purity polymers

contribute to battery cell lifetime optimisation, high thermal conductivity contributes to effective thermal management of battery systems.

**Electrical
Insulating**
(> 5 kV)

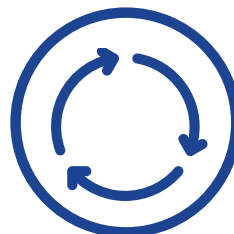

**High
Cleanliness**

**Different colours
available**
(inclusive trans-
parent PET tape)

High Bonding
Type under dev

**Converting in
different shapes**
(Roll type/ cut
parts)
